Rock Mechanics and Mining Sciences

Editor-in-Chief

Professor J. A. Hudson
7 The Quadrangle
Welwyn Garden City
Herts AL8 6SG, U.K.

Editorial Advisors

Professor W. F. Brace
Department of Earth & Planetary Sciences, Massachusetts Institute of Technology, Cambridge, MA 02139, U.S.A.
Professor E. T. Brown
Faculty of Engineering, University of Queensland, St Lucia, Queensland 4072, Australia.
Professor N. G. W. Cook
Department of Materials Science and Engineering, University of California, Hearst Mining Building, Berkeley, CA 94720, U.S.A.
Professor C. Fairhurst
Department of Civil and Mineral Engineering, 122 Civil and Mineral Engineering Building, 500 Pillsbury Drive S.E., University of Minnesota, Minneapolis, MN 55455-0220, U.S.A.
Professor R. E. Goodman
Department of Civil Engineering, University of California, Davis Hall, Berkeley, CA 94720, U.S.A.
Professor E. Hoek
Department of Civil Engineering, University of Toronto, Toronto, Ontario, Canada M5S 1A4.

Editorial Board

Professor G. Barla
Department of Structural Engineering, Technical University (Politecnico) of Turin, Corso Duca delgi Abruzzi 24, 10129 Torino, Italy.
Dr B. H. G. Brady
Dowell Schlumberger Inc., P.O. Box 2710, Tulsa, OK 74101, U.S.A.
Dr F. H. Cornet
Institut de Physique du Globe, Université Pierre et Marie Curie, 4 place Jussieu, 75230 Paris Cedex 05, France.
Professor S. L. Crouch
Department of Civil and Mineral Engineering, 122 Civil and Mineral Engineering Building, 500 Pillsbury Drive S.E., University of Minnesota, Minneapolis, MN 55455-0220, U.S.A.
Professor Y. D. Diadkin
G. V. Plekhanov Leningrad Mining Institute, Leningrad V-26, 21 Liniya 2, U.S.S.R.
Professor H. K. Kutter
Ruhr-Universität Bochum, Institut für Geologie, 463 Bochum, Universitätsstrasse 150, Fed. Rep. Germany.
Dr P. R. La Pointe
ARCO Oil and Gas Company, Research and Development Department, P.O. Box 2819, Dallas, TX 75221, U.S.A.
Professor N. R. Morgenstern
Department of Civil Engineering, University of Alberta, Edmonton, Alberta, Canada T6G 2E1.
Professor Y. Nishimatsu
Department of Mineral Development Engineering, University of Tokyo, Hongo 7-3-1, Bunkyo-ku, Tokyo 113, Japan.
Professor W. G. Pariseau
Department of Mining Engineering, University of Utah, 318 W. C. Browning Building, Salt Lake City, UT 84112, U.S.A.
Professor F. F. Roxborough
School of Mining Engineering, University of New South Wales, P.O. Box 1, Kensington, New South Wales 2033, Australia.
Professor O. Stephansson
Luleå University of Technology, Division of Rock Mechanics, S-951 87 Luleå, Sweden.
Professor T. K. Tan
Institute of Geophysics, Academia Sinica, Beijing, China.
Dr H. Wagner
Chamber of Mines, P.O. Box 809, Johannesburg 2000, South Africa.

Geomechanics Abstracts

Fax. 071-589-6806
Telex 929484

Geomechanics Literature Search Service

The Rock Mechanics Information Service will carry out retrospective information searches on request. This search will encompass the GeoMechanics Abstracts database (see below) which covers all material published in the *International Journal of Rock Mechanics and Mining Sciences & Geomechanics Abstracts* since 1977 and other material published in its original form before and since this date. Other databases may also be searched on request. Initial enquiries may be made by telephone, fax, post or telex. Search requests can be in the requester's own terms or as a list or combination of keywords. Background information on the project requiring the search is also useful. The cost of this service is £40 per search topic plus £0.45 per printed reference (at 12/1989). VAT or airmail postage will be added where applicable. Enquiries should be addressed to the **Rock Mechanics Information Service** at the above address.

Geomechanics Abstracts Data Base

The GeoMechanics Abstracts database (GMA), one of the many available online from the ORBIT Search Service Division of Maxwell Online, covers the fields of rock mechanics, soil mechanics, and engineering geology, plus the many closely related disciplines. GMA is available to the public for literature searching.

For further details please contact the ORBIT Search Service at:

NORTH AMERICA
8000 Westpark Drive, McLean, VA 22102, U.S.A.
Tel: (800) 45-ORBIT (toll free)/(703) 442-0900;
Fax: (703) 893-4632

EUROPE
Achilles House, Western Avenue, London W3 0UA, U.K.
Tel: (081) 992-3456; *Fax:* (081) 993-7335; *Telex:* 8814614

AUSTRALIA
P.O. Box 544, Potts Point, NSW 2011
Tel: (02) 360-2691 (direct)/(02) 331-5211 (switchboard)/(008) 22-6474 (toll-free); *Fax:* (02) 332-2304

JAPAN
USACO Corporation, 13-12 Shinbashi 1-Chome, Minatoku, Tokyo, 105, Japan
Tel: (03) 502-6471; *Fax:* (03) 593-2709;
Telex: J26274 USACO TOKYO

Publishing office: Pergamon Press plc, Pergamon House, Bampfylde Street, Exeter EX1 2AH, U.K. (*Tel.* (0392) 51558; *Fax* 425370).

Subscription and advertising offices: Enquiries from customers in North America should be sent to Pergamon Press Inc., 395 Saw Mill River Road, Elmsford, NY 10523, U.S.A.; and from the rest of the world to Pergamon Press plc, Headington Hill Hall, Oxford OX3 0BW, U.K. (*Tel.* (0865) 794141).

Annual subscription rates: annual institutional subscription rate (1992), £525.00 (US$840.00); 2-year institutional rate (1992/93), £997.50 (US$1596.00). Sterling prices are definitive. U.S. dollar prices are quoted for convenience only, and are subject to exchange rate fluctuation. Prices include postage and insurance and are subject to change without notice. Subscription rates for Japan are available on request. Members of the International Society for Rock Mechanics may order personal subscriptions at a concessional rate. Details of these rates are available on request.

Back issues: Back issues of all previously published volumes, in both hard copy and on microform, are available direct from Pergamon Press.

♾™The text paper used in this publication meets the minimum requirements of American National Standard for Information Sciences—Permanence of Paper for Printed Library Materials, ANSI Z39.48-1984.

Published 6 issues per annum. Copyright © 1991 Pergamon Press plc

CONTENTS OF VOLUME 28

NUMBER 1

J. A. Hudson	I	Editorial
T. J. Boone, A. R. Ingraffea and J.-C. Roegiers	1	Simulation of hydraulic fracture propagation in poro-elastic rock with application to stress measurement techniques
C. S. Desai and K. L. Fishman	15	Plasticity-based constitutive model with associated testing for joints
P. R. Sheorey	27	Experiences with application of the NGI classification to coal measures
G. Wijk	35	Rotary drilling prediction
Z. P. Bažant, R. Gettu and M. T. Kazemi	43	Identification of nonlinear fracture properties from size effect tests and structural analysis based on geometry-dependent R-curves
C. D. Martin and R. Christiansson	53	Overcoring in highly stressed granite—the influence of microcracking
Technical Notes		
R. Duclos and J. Paquet	71	High-temperature behaviour of basalts—role of temperature and strain rate on compressive strength and K_{Ic} toughness of partially glassy basalts at atmospheric pressure
S. Okubo, Y. Nishimatsu and K. Fukui	77	Complete creep curves under uniaxial compression
P.-J. Périé and P. Monteiro	83	Determination of fracture mechanism by microscopic observation of cracks
W. H. Gerstle and A. R. Ingraffea	85	Compliance and stress-intensity factor calibration of the CENRBB specimen using the boundary element method
X. D. Pan and M. B. Reed	93	A coupled distinct element–finite element method for large deformation analysis of rock masses
B. Wu, M. S. King and J. A. Hudson	101	Stress-induced ultrasonic wave velocity anisotropy in a sandstone
A. Bro	109	Three-dimensional styrofoam models of blocky rock masses
W. A. Olsson	115	The compressive strength of tuff as a function of strain rate from 10^{-6} to 10^{3}/sec
Errata	119	
Geomechanics Abstracts	1A	

NUMBER 2/3

J. C. S. Long, K. Karasaki, A. Davey, J. Peterson, M. Landsfeld, J. Kemeny and S. Martel	121	An inverse approach to the construction of fracture hydrology models conditioned by geophysical data: an example from the validation exercises at the Stripa mine
N. R. Warpinski and L. W. Teufel	143	*In situ* stress measurements at Rainier Mesa, Nevada Test Site—influence of topography and lithology on the stress state in tuff
I. Vardoulakis and E. Papamichos	163	Surface instabilities in elastic anisotropic media with surface-parallel Griffith cracks
C. L. Smither and T. J. Ahrens	175	Displacements from relief of *in situ* stress by a cylindrical hole
N. R. Morgenstern and K. Sepehr	187	Time-dependent hydraulic fracturing in potash mines
J. F. Labuz and L. Biolzi	199	Class I vs Class II stability: a demonstration of size effect
L. Holla and M. Buizen	207	The ground movement, strata fracturing and changes in permeability due to deep longwall mining
Technical Notes		
X. Yi, Z. Sun, F. Ouchterlony and O. Stephansson	219	Fracture toughness of Kallax gabbro and specimen size effect
M. Cai and R. L. Blackwood	225	A technique for the recovery and re-use of CSIRO hollow inclusion cells
Discussion		
M. E. Duncan Fama, R. J. Walton and G. Worotnicki	231	Discussion of paper by Wu Zhenye and Li Shiping, "The generalized plane strain problem and its application in three-dimensional stress measurement"
Corrigenda	233	
Geomechanics Abstracts	63A	

NUMBER 4

Y. Wang and M. B. Dusseault	235	Borehole yield and hydraulic fracture initiation in poorly consolidated rock strata—Part I. Impermeable media
Y. Wang and M. B. Dusseault	247	Borehole yield and hydraulic fracture initiation in poorly consolidated rock strata—Part II. Permeable media
M. S. Bruno and F. M. Nakagawa	261	Pore pressure influence on tensile fracture propagation in sedimentary rock
D. H. Zou and H. D. S. Miller	275	Simulation of microseismic emission during rock failure
T. Ito and K. Hayashi	285	Physical background to the breakdown pressure in hydraulic fracturing tectonic stress measurements
S. J. Martel and J. E. Peterson Jr	295	Interdisciplinary characterization of fracture systems at the US/BK site, Grimsel Laboratory, Switzerland
R. W. Zimmerman, S. Kumar and G. S. Bodvarsson	325	Lubrication theory analysis of the permeability of rough-walled fractures

Technical Notes

Xianbin Yu and B. Vayssade 333 Joint profiles and their roughness parameters

J. L. Ratigan and T. J. Vogt 337 A note on the use of precision level surveys to determine subsidence rates

Discussion

W. G. Pariseau 343 Discussion of a paper by Wu Zhenye and Li Shiping, "The generalized plane strain problem and its application in three-dimensional stress measurement"

Geomechanics Abstracts 199A

NUMBER 5

W. Z. Savage and W. A. Braddock 345 A model for hydrostatic consolidation of Pierre shale

K. Matsuki, S. Matsune and H. Takahashi 355 Boundary element analysis for standard specimen configurations in the ISRM Suggested Methods for Determining Fracture Toughness of Rock

K. Matsuki, S. S. Hasibuan and H. Takahashi 365 Specimen size requirements for determining the inherent fracture toughness of rocks according to the ISRM Suggested Methods

A. Shapiro and J. L. Delport 375 Statistical analysis of jointed rock data

B. Amadei and W. Z. Savage 383 Analysis of borehole expansion and gallery tests in anisotropic rock masses

A. Ord, I. Vardoulakis and R. Kajewski 397 Shear band formation in Gosford sandstone

Technical Notes

E. A. Eissa and Z. Şen 411 Intact length correlation in relation to rock quality designation

Z. Şen and E. A. Eissa 421 Cumulative semivariogram technique for identification of intact length correlation structure

J. Hadizadeh and R. D. Law 431 Water-weakening of sandstone and quartzite deformed at various stress and strain rates

H. J. Vinegar, J. A. de Waal and S. L. Wellington 441 CT studies of brittle failure in Castlegate sandstone

W. W. Wepfer and N. I. Christensen 451 A seismic velocity-confining pressure relation, with applications

Supplement

M. Mauldon and R. E. Goodman 457 Supplement to paper "Rotational kinematics and equilibrium of blocks in a rock mass"

Geomechanics Abstracts 265A

NUMBER 6

J. M. Kemeny 459 A model for non-linear rock deformation under compression due to sub-critical crack growth

Y.-W. Pan and J.-J. Dong	469	Time-dependent tunnel convergence—I. Formulation of the model
Y.-W. Pan and J.-J. Dong	477	Time-dependent tunnel convergence—II. Advance rate and tunnel–support interaction
N. A. Filatov and V. M. Barkovskiy	489	Photomechanical modelling in geomechanics
Technical Notes		
J. Litwiniszyn	501	Remarks on the equations of state of outburst rocks regarded as a solid solution
A. I. Oliva, J. H. Balancán, M. E. Navarro, V. Sosa, L. A. Maldonado, P. Bartolo, R. E. Castro and J. A. Azamar-Barrios	509	A thermal method to fracture rocks
G. Yu, K. Vozoff and D. W. Durney	515	Effects of confining pressure and water saturation on ultrasonic compressional wave velocities in coals
J. A. Hudson	523	Atlas of Rock Engineering Mechanisms: underground excavations
M. Sakellariou, B. Nakos and C. Mitsakaki	527	On the fractal character of rock surfaces
Qing Zhang, Jiarong Song and Xiaoyan Nie	535	Application of neural network models to rock mechanics and rock engineering
Geomechanics Abstracts	331A	

VOL. 28 SUPPLEMENT

The International Society of Rock Mechanics Directory of Members 1991 was produced as a Supplement to the journal during 1991. It was supplied to all subscribers with their copy of Volume 28 Number 5.
